Kemin FloraGLO® Lutein Now Authorized in Brazil for Children and Teens

ANVISA expands access to lutein from Tagetes erecta for ages nine to 18

DES MOINES, Iowa, U.S. (January 13, 2026) – Kemin Industries, a global ingredient manufacturer that strives to sustainably transform the quality of life every day for 80 percent of the world with its products and services, announces that Brazil's regulatory authority, Agência Nacional de Vigilância Sanitária (ANVISA), has authorized the extended use of lutein from *Tagetes erecta* flowers in food supplements for children and adolescents ages nine to 18. Kemin is proud of its contribution to this important regulatory milestone, a development that represents a major step forward in supporting lifelong eye and brain health for Brazilian families.

While traditional nutrition often focuses only on essential vitamins and minerals, FloraGLO Lutein delivers a science-backed upgrade as a multisystem approach to eye and brain health that helps children and teens thrive in today's screen-saturated, cognitively demanding world.

This approach was proven in a revolutionary clinical study of preadolescent and adolescent children that highlighted the impact of FloraGLO Lutein on two interdependent biological systems, showing measurable benefits in reducing eye fatigue and improving cognitive functions.

"Young people today face increasing screen time and selective eating habits, which can leave critical nutritional gaps," said Rosemeire Shiraishi, Country Manager – South America, Kemin Human Nutrition and Health. "FloraGLO Lutein helps address these gaps by providing targeted support for developing eyes and minds, including protection against harmful blue light and reinforcement of cognitive resilience."

Backed by over 100 peer-reviewed publications and trusted by eye-care professionals worldwide, FloraGLO Lutein continues to lead the field as the most clinically studied lutein brand—setting the standard for future innovation across all ages and life stages.

"ANVISA's authorization follows a rigorous scientific and regulatory evaluation, to which FloraGLO's science, safety, and quality were major contributors," said Bárbara Mião, Regulatory Affairs Manager – Latin America, Kemin Human Nutrition and Health. "This milestone reinforces our commitment to delivering trusted, high-impact solutions for every stage of life, and we're very proud to expand FloraGLO's reach to support families across Brazil."
