

Kemin Textile Auxiliaries Becomes Official bluesign® system partner

Adhering to bluesign® reinforces Kemin Textile Auxiliaries' commitment to sustainability and provides customers further guarantee of transparent and traceable production processes

REPUBBLICA DI SAN MARINO

(December 2, 2020) – Kemin Industries, a global ingredient manufacturer that strives to sustainably transform the quality of life every day for 80 percent of the world with its products and services, announced today that Garmon Chemicals (Garmon), Kemin's textile auxiliaries business unit and the chemical solutions brand for the denim and fashion industry, has officially become a bluesign® system partner.

bluesign® is a leading global, independent verifier that supports the textile industry in its efforts to improve sustainable processes. Created in 2000 and supported by some of the world's most important chemical suppliers, textile manufacturers and brands – such as NIKE® and adidas® – bluesign® has become a guarantee of responsible and transparent production processes.

To become a bluesign® system partner, a chemical company must undergo a strict onsite assessment to examine the transparency of its manufactured chemical products and their risks. To pass the assessment, the chemical company must meet strict criteria of resource efficiency, work safety and environmental and consumer protection.

Becoming a bluesign® system partner was a natural progression for Kemin Textile Auxiliaries, as Garmon is a pioneer in sustainability with a long history of developing eco-friendly and safe solutions. Garmon was one of the first chemical companies in the garment finishing industry to certify its products, offering its customers further guarantee of their superior ecological performance.

With many Garmon products already in the ZDHC Gateway, the database of safer chemicals adopted by the majority of fashion brands, and the company's adherence to bluesign® system, Kemin Textile Auxiliaries can meet all its customers' needs in terms of sustainability – all while maintaining the highest standards of quality and traceability to meet brand expectations.

###

About Garmon Chemicals

Kemin Textiles Auxiliaries, through the brand **Garmon Chemicals** (Garmon), is a leader in the R&D and marketing of total chemical solutions, innovation and creativity for the denim and apparel industry. The company is internationally recognized as a symbol of pioneering evolution in the name of a better tomorrow.

Since its birth in 1982, Garmon established itself at the very center of a narrative that talks to manufacturers, apparel brands and retailers about innovative chemical auxiliaries and solutions. For over 30 years, Garmon

has been an R&D and marketing platform for fashion innovation and a reference for product quality and responsible practices.

With manufacturing facilities in San Marino, Brazil, China, India and Turkey, the company operates in more than 30 countries through a commercial network of subsidiaries and agents. This global footprint ensures technical assistance in strategic textile areas around the world, as well as capillary distribution of both chemical products and related know-how.

About Kemin Industries

Kemin Industries (www.kemin.com) is a global ingredient manufacturer that strives to sustainably transform the quality of life every day for 80 percent of the world with its products and services. The company supplies over 500 specialty ingredients for human and animal health and nutrition, pet food, aquaculture, nutraceutical, food technologies, crop technologies and textile industries.

For over half a century, Kemin has been dedicated to using applied science to address industry challenges and offer product solutions to customers in more than 120 countries. Kemin provides ingredients to feed a growing population with its commitment to the quality, safety and efficacy of food, feed and health-related products.

Established in 1961, Kemin is a privately held, family-owned-and-operated company with more than 2,800 global employees and operations in 90 countries, including manufacturing facilities in Belgium, Brazil, China, India, Italy, Russia, San Marino, Singapore, South Africa and the United States.
